\*Purple background courses are mandatory

\*2 electives per term, you have to figure out how to organize your schedule (see links)

### Generalist

- Look on the undergraduate calendar for upper year courses you are interested in and potentially take their prerequisites this year
- Try to take a division A or division B course
- Have to take at least one of CH250, PS263, BI236; and must have all three courses completed by the end of third year

### Bio-Med Stream

- Microbes and Genetics (BI276, BI226) recommended to cover prerequisites for upper year bio courses that you may need
- For the third elective, consider a division A/B course, or one of CH250 or PS263

### Med-Chem Stream

- CH250 and CH203 should open up most courses that you will need in upper years
- Consider taking a division A/B course
- Consider taking PS263 and/or BI236
- Refer to undergraduate calendar for cross listed courses that will count towards the med-chem stream as an elective

### Med-Psych Stream

- Consider taking CH250 and/or BI236
- Consider taking a division A/B course
- Consider taking one or more of the following second year psych courses (PS260, PS262, PS282, PS275, PS276, PS277), but not both PS276 AND PS277. Three of these courses are required to complete the med-psych stream
